

I urge you to deny BellSouth's petition to stop regulating broadband service. I have been a user of broadband internet for the past 5 years, and have received my service from a wide variety of ISPs. The ones that I have shudder-inducing horror stories to share with my friends about are always the RBOC providers, and the ones I have been very pleased with are the two independent ISPs, for quality, price, and service. To de-regulate broadband internet would be to condemn consumers to poor service, high prices, and sluggish internet performance.
